Your paper title goes here

Author One, Author Two
Mila / Université de Montréal

Summary

- Help a reader understand the work without talking to you.
- Summarize the question, contribution, and main finding.
- Give a **quick overview** worth saving in a photo.

Method

- Explain the essential idea in a few short bullets.
- Use a small diagram when it makes the method clearer.
- Keep this pane readable in about one minute.

Conference name / Year

Your main takeaway.

One or two sentences for people walking past.

Optional main-result figure

Use only if it makes the takeaway clear at a glance.

Figure 1. Give just enough context to understand the result at a glance.

Why it matters

State the significance in plain language. Keep the takeaway dominant.

← Paper Code →

Experiments and details

- Choose figures and tables to support a conversation.
- Use short captions; explain the details in person.
- Keep labels, units, and evaluation conditions clear.

Discussion figure or table

Limitations

Note the assumption or limitation needed to interpret the results.

Next steps

Add only details that help explain your main points.
